
PRICE QUOTE CALCULATION

Determining a price for freelance writing can be quite a tricky task. Depending on many factors, like

- the type of project and its technicality
- the desired deadline
- the length of the piece
- the amount of research to be done
- the preferred language

prices can vary. Because agreeing on a price can only be done in consultation, I offer each client a non-obligatory estimation of the costs based on the input that has been given on the specific project.

Because I do understand the desire to have at least some sort of reference to the average costs, you can check out the list in the middle of the page. In this column I've averaged out extremes, in which way I'm able to provide some small indicators to determine a price.

PRICELIST

FREE VERSE POETRY

by the hour € 62,00
by line € 6,00
by word € 0,67
